Mud, Bikes, and Ham Radio

Behind The Mike

Hi Everyone!!

Happy Thanksgiving!!

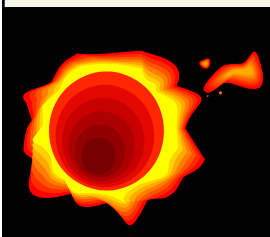

Well October is on us, hopefully the bands are hopping for you, and you're making plenty of qso's on the HF bands if capable and getting a few new people into the logbooks.

This months newsletter will feature many pictures from club members from both our Sermon on the Mount in September as well as the mud ride of the century Paul's Dirty Enduro. I'm sure I'm being nice with that description but that about sums that day up here some mud there some mud everywhere there's lots of mud.

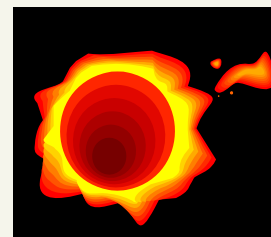

I don't have much to add except for that so enjoy the pictures, the articles from our club, and the stories I found this month on the Twitter front and we will see you at the October Club meeting at Whitecliffe Terrace Retirement Center in Court on October 15th at 1930 hrs.

Until then
73's & 88's

Martha

Propagation Reports by Ray Zambonelli **VE3OUB**

<http://dx.qsl.net/propagation/propagation.html>

Some words from a member

You all know Ray VE3OUB a long time member of the NSARC. Well he has moved into his Daughters house so that she can look after him better. Ray asked if the club could help remove the antennas and equipment from his apartment building. This means that all of the antennas on the roof as well as his equipment will have to be removed. On September 9th Peter Henry VA3PWH, Tom Kennedy VA3TVK and myself VE3CRK went up on the roof of the building and lowered his antennas on to the roof. On September 23rd we returned with Peter's trailer and removed all of the antennas, six cement 24x24 inch slabs, and eight cement blocks, 4x4 foot of 3/4 inch plywood and Styrofoam to protect the roof at the base of the antenna. All hardware removed and holes sealed. Thanks Tom for taking those 24x24 slabs as well as the cement blocks down the stairs from the roof to the seventh floor for us.

On September 30th I returned with Steve Mc Edwards VA3TPS, Peter Johns VE3PWJ and met Elizabeth, Rays Daughter, at the apartment and removed all of Ray's radio equipment for storage. Elizabeth will store it until we can set it up again for Ray in her home. We plan to make one more trip before the end of the month to clean out a locker he has in the basement.

Thanks Guys
Ralph VE3CRK

Paul's Dirty Enduro 2013 Report

It was a rainy day - - - is an understatement.

The day started with rain and a 0600hr breakfast at the 5th Wheel Truck Stop in Bowmanville. Here assignments were handed out along with packages containing information required for the day; as well Laird **VE3LKS** discussed how control wanted traffic handled.

Setup of Control went well at the Ganaraska Forest Centre. We had control set up under a screened in tent and an open sided sun tent. Steve **VA3TPS** had the repeater up and running at Richardson's Lookout. The coveted Tee shirts were handed out. Food Truck and Food Zone Radio operators checked out their contacts and departure times. This year they had only one medical personnel to take care of any mishaps, he was informed about our location and how we can assist him. All of this was done while it poured.

The 100km is the first Enduro of the day starting at 0800hr. At control, Laird **VE3LKS** and Peter, the Enduro rep, waited to hear from Luis **VE3TCL** at the West Food Zone for the first rider. Word came about 30 minutes after the expected time. This set the pace for the day, we now could expect all the Enduros to run late. It was only a short time later when one of the riders from the 100k was back at the Forest Centre as a DNF (Did Not Finish) this also set the pace for the day. The rain and muddy trails were taking a toll on the riders and their bikes.

The 60k, 30k and 15k Enduros started on time and rider numbers were being reported back to control. Some confusion began to show up in the rider numbers being reported. By the end of the day between our Radio operators at the Food Zones, the Food Trucks and Control along with the Enduro reps we were able to make sure all riders were accounted for and back safely in the rain. Nice work!

Some of the confusion with rider numbers stemmed from problems at registration, which believe it or not was caused by the weather. The organizers know how this happened and already have a tentative solution. Other problems were due to poor record keeping by others which has also been brought to the attention of the organizers.

This year's Radio operators were: Laird **VE3LKS** – Control, Steve **VA3TPS** – Repeater, Tony **VA3ZAI** Assistant Control, Luis **VA3TCL** – West Food Zone, Martha **VA3SBD** & Clint **VA3KDK** – Central Food Zone, Doug **VA3DCE** & John **VA3TEE** – East Food Zone, Ken **VE3RMK** & Jonathon SWL – South Food Zone, Larry **VA3FHG** – Food Truck, Henry **VE3OEO** Food Truck, Peter **VE3PWJ** – Food truck and Joe **VE3VGJ** ATV1 and Gofer.

Even with the rain the day went well. Unfortunately it did result in poor rider attendance. I had a talk with Kt and she couldn't thank us enough for or help with this event. I told her we had a good time and will be back again next year. Mark your calendar, Paul's Dirty Enduro 2014 will be on Saturday Sept 20 2014. Thank you for all those involved in this year's Enduro, looking forward to 2014.

73 Joe **VE3VGJ**

The Members Post

Thanks Joe **VE3VGJ** for taking on this job this year. You did an outstanding job!!! I'm sure all the Paul's Dirty Enduro radio operators will agree with me on that one. I'm definitely looking forward to working with you next year when it will be even better.

Your first time organizing went amazing considering it was full of challenges, hiccups, and lots and lots of mud and mother nature fun.

Kudo's to you and hip hip hooray!!!

Martha VA3SBD and all the other members of the club under your wing for Pauls Dirty Enduro.

On another note here's an excerpt of something Kt wrote as a comment to Tony's, **VA3ZAI**, posting on the Pauls Dirty Enduro facebook page regarding our duties at said event. Enjoy!!!

Anthony ImBoden

While I may not have been on the trails, I was more than happy to volunteer my time with North Shore Amateur Radio Club providing communications at each of the feed zones, making sure that all the riders were safe. I'll be back next year if I'm able

Kt Misener the radio club really really shone yesterday. It was a tough, tough coordination day with new stuff being thrown at y'all moment to moment. But as always y'all were our lifeline. Without you we could NOT do this even. Nobel prize for communications goes to.... (drum roll please) the NSARC!!

Congratulations!

New Products - New Products - New Products - New Products - New Products - New Products

Amateur Radio

LDG RT100 Remote Antenna Tuner

This tuner mounts near the feedpoint of your antenna so feedline loss is reduced to a minimum. Powered through the coax line so no separate power cables are needed!

[More Info](#)

Autotuner for Alinco Including DX-SR8T

The LDG AL-100 tunes HF to 6 metres. Fast tuning and lightning-fast recall due to its 2,000 memories.

[More Info](#)

Remote Controller for RT100

The RC100 is a convenient way to get the required DC voltage on to the coax cable as required by the RT100 shown above. Also controls additional modes of operation too.

[More Info](#)

Dual Analog Meter for the Kenwood TS-990S

LDG's DM-990 dual meter system provides two 4.5" meters, one for the Main receiver and one for the Sub. You can set what info this meter displays independantly of the meter on the radio!

[More Info](#)

Carrying Case for Comet CAA-500

This rugged padded carrying case is custom made to perfectly fit the CAA-500 analyzer. Features a clear PVC cover over the meter and a velcro flap that protects the front panel when not in use. [More Info](#)

Backlit Cross-Needle Meter to 1W - 2KW

The OPEK SWR6L cross-needle meter covers 160 though 6 metres with 20, 200 and 2KW power scales. Instantly see your SWR without calibration.

[More Info](#)

4-Position Switch 1 to 900MHz

The JTCS4M grounds all inactive positions so it can be used to switch 4 antennas to one transceiver or 4 radios to one antenna. Handles up to 1.5kW

[More Info](#)

ISOpwr Auxiliary Battery Isolator

Protects the primary battery while supplying power to the "spare" battery and equipment. With an ISOpwr isolator, the vehicle battery will never be drained by leaving the equipment turned on, so the vehicle will always start! [More Info](#)

SMA24 Thin Dual Band HT Antenna

The Comet SMA24 is 17" long and has 2.15/5.3 dBi gain. Handles up to 20 Watts.

[More Info](#)

[Wouxon Version](#)

Software with Cable for TH-K20

The KRSK20 allows you to program memories and settings of the radio and even store them on your PC. Includes programming cable.

[More Info](#)

Software for Yaesu FT1DR

The ADMS-FT1D-U allows you to program memories and settings of the radio and even store them on your PC. Cable NOT included.

[More Info](#)

Programming Software Kit for Icom IC-7100

The WCS7100USB allows you to program memories and settings of the radio and even store them on your PC. Includes USB-RTS01 programming cable.

[More Info](#)

AM/FM

Bluetooth Speaker with FM/USB & SD

Powered by a rechargeable battery, the C. Crane Senta Ally allows you to play music from your phone, SD or USB stick or from the built in FM radio. Answer calls from your phone! At just 10 ounces it makes it an excellent speaker for those that can't go without good audio at their travel

destinations. 3.5mm aux input for MP3 player or other radio equipment. [More Info](#)

The Best AM/FM Digital Radio on the Market!

The Sangean PRD-15 features an excellent AM/FM tuner combined with great sound that includes a loudness control and separate treble and bass controls. Built-in clock with alarm, snooze and sleep timer. Large backlit display.

[More Info](#)

Scanners

BC-346XTC Trunktracking III Handheld Scanner

Receives most Motorola, EDACS and LTR Systems. Close Call™ RF Capture Technology zeroes in on nearby transmissions without the need for programming.

[More Info](#)

Miscellaneous

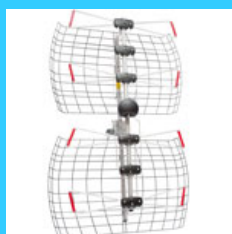

TNC Crimp for RG58

A quality TNC male connector for RG58 and LMR195 cable.

[More Info](#)

TV

Antennas Direct DB4E HDTV Antenna

With its added gain of 14.5 dBi, the DB4E is the strongest multi-directional antenna in the world.

[More Info](#)

Five-foot Mast Pipe

The 6008 mast pipe is 1-1/4 inches in diameter and 5 feet long. Made of 18 gauge galvanized steel. Swaged end.
